30 June 1978

Request

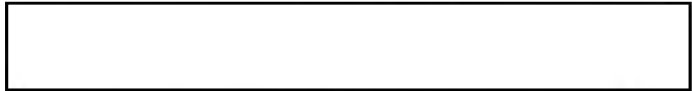

MEMORANDUM FOR THE RECORD

SUBJECT : Meeting with HSCA Chief Counsel Blakey

1. At a meeting with Mr. Blakey yesterday afternoon, he referred to a letter his staff is preparing on future requests and our response. Because of the HSCA schedule (the basic investigation had been planned to end 30 June) there must be a cut-off date in new requirements to us. The current thinking is that this should be three weeks and then no more new requests. He pointed out that there would be "second generation and third generation requests", i.e., issues arising out of review of first responses would have to be pursued.

2. He said that whatever we did not produce in the three-week period would be considered by him as "non-compliance." I said that we had been considering a period of burst activity, and this provided the occasion to address the matter directly.

3. Recipients of this memorandum are requested to review the status of requests received by them and consider what steps can be taken in the next three weeks to accelerate processing of outstanding requests, as well as those received during this period. The objective is to have all ready for review within that period.
